Technologies

Primary Languages: C#, Python, SQL, C++, C, Javascript

Primary Frameworks: Autodesk Revit API, ASP.NET, Blazor, MVC.NET

Cloud Services: AWS, GitHub, Azure Repos, Azure App Service, Jira, Autodesk Platform Services

Experience

Elara Spatial

Startup using computer vision to simplify residential insurance adjustment

Backend Engineer

June 2023 – September 2026

- Developed Amazon Web Services Lambdas, Step Functions, and Code Pipelines that interfaced with parametric 3D models
- Developed Python software to translate between architectural modeling formats including Revit, IFC, and FIF
- Developed a pyrevit extension to assist with exporting IFC models from Revit
- Developed an Autodesk Platform Services Design Automation application using C#

KLH Engineers/Levcon Analytics

Architectural engineering firm pursuing the bleeding edge of automation and interdisciplinary communication

Software Engineer

May 2019 – June 2023

Cooperative Education Student

May 2018 – May 2019

- Developed enterprise software and external products using the .NET Framework and the Revit API
- Designed software architecture for multi-platform applications
- Lead an agile team using Scrum methodologies
- Developed web applications in Blazor for ASP.NET and CI/CD processes through Azure Repos and git
- Deployed web services to Azure
- Developed machine learning models that integrated into the existing architectural design process

Lampros Labs

Web development firm targeted at local startups and marketing agencies

Contractor

August 2017 – December 2017

- Contributed to front end web development using Wordpress and Sharepoint, and to back end web development using PHP, Ruby, and Python
- Interfaced with clients to create and present estimates and share project status reports
- Researched industry trends in blockchain technologies and created reports on that research

Assurex Health

Pharmacogenetics lab offering the GeneSight testing product

Software Development Co-Op

June 2016 – March 2017

QA Automation Co-Op

August 2015 – June 2016

- Developed an internal customer service web portal using C#, ASP.NET, and Angular Material, automated unit tests using Selenium in C#, and software to interface with genetics lab equipment

Presentations

"A Practical Use of Machine Learning in the AEC Industry," Autodesk University 

November 2019

Education

University of Cincinnati, BS in Computer Science

2014 – 2019

- **Coursework included:** Cooperative Education, Software Architecture, Machine Learning, Computational Theory, Software Engineering

University of Cincinnati, BA in Philosophy

2018 – 2020

- **Coursework included:** Formal Logic, Philosophy of Science, Philosophy of Mind, Ethics, History of Philosophy
